# Description

In this web app the floor installers can create profiles with their projects and their installation fees.

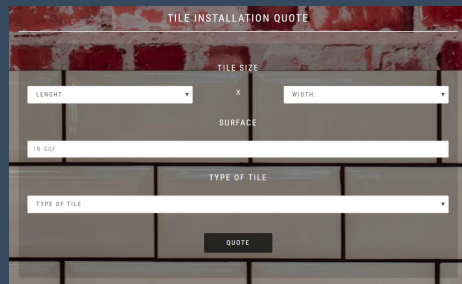

For floor installers, this app is going to be a good source to get new clients and jobs.

At the same time people wishing to hire this type of work will have a transparent and varied source of price offers in the app with the contacts of the suppliers.

# Features

- Basic CRUD repository.
- Query interface for quotation.
- Access to information of installer.

A screenshot of a web form titled "TILE INSTALLATION QUOTE". The form is set against a background image of a brick wall. It contains several input fields: "LENGTH" and "WIDTH" are dropdown menus under the heading "TILE SIZE"; "SURFACE" is a text input field; "IN SQ" is a text input field; and "TYPE OF TILE" is a dropdown menu. A dark button labeled "QUOTE" is positioned at the bottom right of the form.

# Planning - User Stories

As customer:

- You can request a quote for tile installation and get different installer offers.

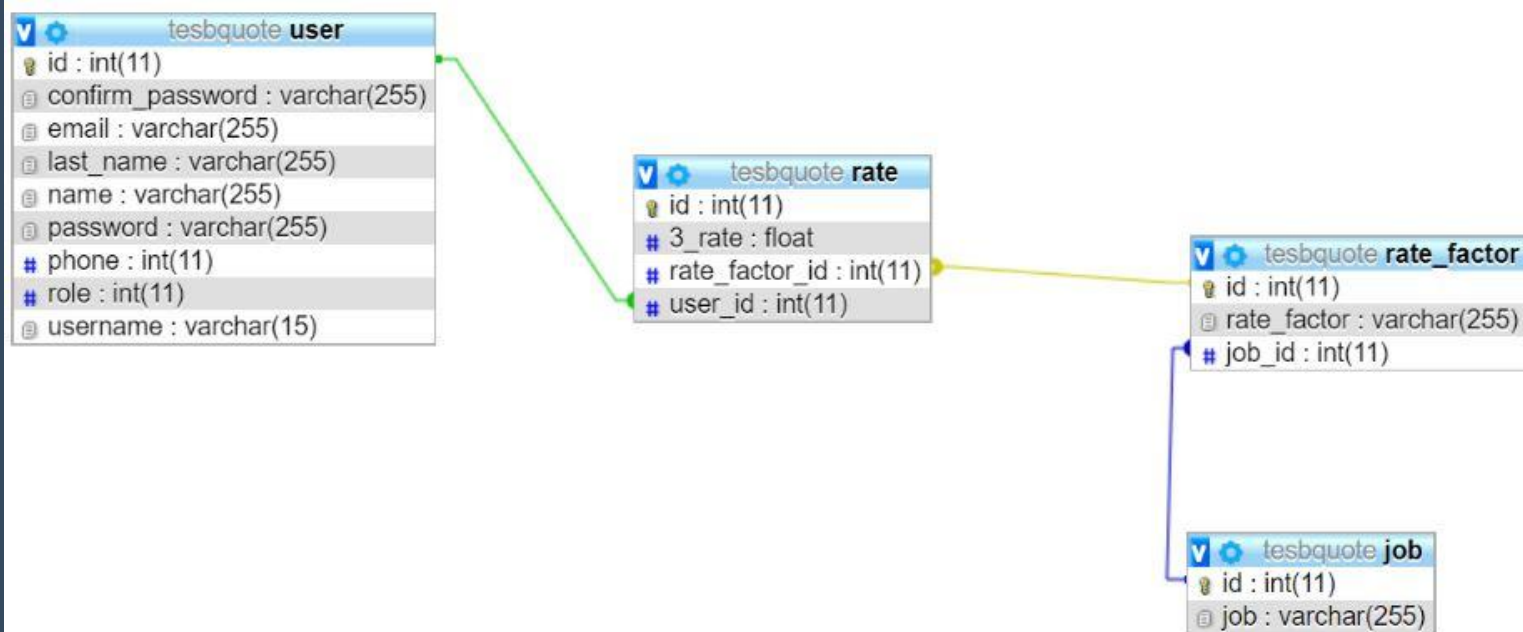

As installer:

- You can update his profile with new rates, images of projects and special offers.
